CRISIS MAP

Offline Disaster Impact Assessment Report

Location	MIT-WPU Kothrud
Coordinates	18.5087°N, 73.8203°E
Elevation	575 m
Disaster	Wildfire
Intensity	7.0 / 10
Duration	2.0 h
Preparedness	25%
Time of Day	22:00 hrs
Season	Summer
Generated	22 Oct 2026, 11:55 AM

Composite Risk Score

EXTREME RISK **76** **/100**

90% confidence interval: 68 – 85 (σ=5.0, n=500 samples)

Extreme wildfire risk at MIT-WPU Kothrud. The assessment score is 76/100 across hazard, exposure, and vulnerability factors. Confidence interval (90%): 68–85.

Estimated affected radius: 2.6 km

Component Breakdown

Component	Score	Weight
Physical Hazard	100.0	59%
People Exposure	50.0	20%
Social Vulnerability	34.5	21%

Hazard Factors

Factor	Value
Fire Weather	70.0
Vegetation Fuel	30.0
Dryness	35.8
Wind Exposure	75.0
Season Factor	150.0

Time Factor	125.0

Suggested Actions

1. Clear combustible material along evacuation routes.
2. Stage water and monitor downwind areas.
3. Create defensible space around structures.
